

building bespoke fruit programs

premium chilean cherries 2026년

+10 orchads

with more than 10 orchards in the curicó region,
we oversee the full production cycle year-round,
from field management to harvest

+2m kg

every year, we harvest, process, and deliver
more than 2 million kilograms of fresh cherries
to markets around the world

what we do

we manage cherry programs from orchard to export, combining field operations, quality control, packing coordination, and international commercial execution

orchard management
year-round orchard oversight, crop care, and harvest planning

quality control
strict quality supervision at origin and destination

packing and processing
coordination of packing operations to meet each program's specifications

export execution
shipment planning, documentation, and commercial follow-through

client programs
tailored supply programs designed around volume, timing, and market needs

why clients work with mck

quality focus

we prioritize condition, sizing, and presentation according to each market

international mindset

we work with global clients and understand export requirements, timing, and expectations

consistent supply

our structure allows us to build serious export programs with continuity

commercial clarity

clear communication, defined terms, and professional execution throughout the process

from orchard to market

- 1 orchard care
- 2 crop monitoring
- 3 harvest coordination
- 4 packing and quality control
- 5 export logistics
- 6 international delivery
